

AP-NAVIGATOR® GPS ANTENNA

APG500

Tracking with Versatility

The AP-Navigator® GPS is a simple and easy to install solution that includes a Trimble 12 channel GPS Receiver and GPS Antenna, both inside our patented low profile antenna design. The AP-Navigator™ GPS is ideal for users who want to add on GPS and AVL functionality to their fleet of vehicles. So, all of your antennas and your GPS receiver are in this one unit.

Key Benefits:

Bring Mapping and Automatic Vehicle Location Technologies to your fleet of vehicles.

The AP-Navigator® GPS is a full 2 way communicating 12 channel GPS receiver, able to provide 10 foot accuracy. GPS protocols include TSIP, TAIP, TRCM, and NMEA. This means that every AVL software and Internet Mapping solution will work with this GPS receiver.

Long Product Life – Low Profile Design

The AP-Navigator® GPS has a low profile design. It withstands all of the natural elements, car washes, and being swept by tree branches.

Make Your Investment Last

By keeping the GPS receiver separate from your computer, you ensure longer product life. When it comes time to refresh your computer, you do not need to re-purchase GPS. The AP-Navigator® GPS will last you many years.

Very Simple Install – only one unit for everything

You will only need to drill one hole and feed the cable assembly through to your computer or docking station. Here, the AP-Navigator® GPS connects via USB. If you ever need to move this to another vehicle, the take out and re-install will take minutes. Keep all your GPS system even after you upgrade your laptop or vehicle.

**Antenna Plus Connects
To All Docking Stations!**

AP-NAVIGATOR® GPS ANTENNA

(APG500)

GPS Receiver

Key Features

- 12-channel simultaneous operation
- Ultra-low power consumption: less than 90 mW (27 mA) @ 3.3 V
- Dual sensitivity modes with automatic switching
- Aided BPS through TSIP
- Trimble GPS Engine

Performance Specifications

General L1 (1575.42 MHz) frequency, C/A code, 12 channel, continuous tracking receiver

Update Rate TSIP @ 1Hz; NMEA @ 1 Hz; TAIP @ 1 Hz

Accuracy Horizontal: < 5 meters (50%), < 8 meters (90%)
Altitude: < 10 meters (50%), < 16 meters (90%)
Velocity: 0.06 m/sec
PPS(static): +50 nanoseconds

Acquisition (Autonomous Operation in Standard Sensitivity Mode)

Re acquisition: < 2 sec. (90%)
Hot Start: < 10 sec. (50%), < 13 sec (90%)
Warm Start: < 38 sec. (50%), < 42 sec (90%)
Cold Start: < 50 sec. (50%). < 84 sec (90%)

(Cold start requires no initialization, Warm start implies last position, time and almanac are saved by backup power.)

(Hot start implies ephemeris is also saved.)

Optional (COCOM) Limits

Altitude: 18,000 m
Velocity: 515 m/s
Either limit may be exceeded but not both

Interface Characteristics

Connector USB
Protocols TSIP, TAIP, NMEA 0183 v3.0, TRCM SC-104
NMEA Messages GGA, VTG, GLL, ZDA, GSA, GSV and RMC
Messages selectable by TSIP command
Selection stored in flash memory

Electrical Characteristics

Prime Power +3.0 VDC to 3.6 VDC (3.3 V typ.)
Power Consumption less than 90 mW (27 mA) @ 3.3 V
Backup Power +2.5 VDC to +3.6 VDC (3.0V typ.)
Ripple Noise Max 60 mV, peak to peak from 1Hz to 1 MHz

Environmental Specifications

Operating Temperature -40°C to +85°C
Storage Temperature -55°C to + 105°C
Vibration 0.008 g²/HZ 5 Hz to 20 Hz
0.05 g²/Hz 20Hz to 100 Hz
-3 dB/octave 100Hz to 900Hz
Operating Humidity 5% to 95% R.H. Non-condensing, at +60°C

Dimensions

Mount	Adhesive or Magnet
A	3.2 in (81 mm)
B	1.1 in (33 mm)
